Touch the screen to start the transaction;

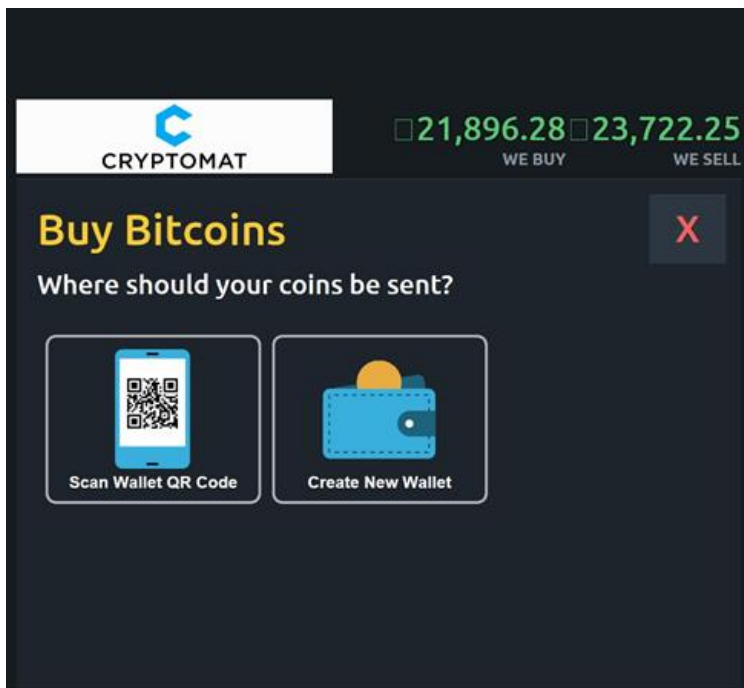

Buy Coins

From the start menu select → Buy Coins;

Select the coin you want to buy: Bitcoin, Litecoin, Ethereum or Bitcoin Cash;

For purchasing the coins you can use your digital wallet or generate a new one (printed out buy machine):

Buy Coins via Digital Wallet

If you already have a digital wallet, select the option → Scan Wallet QR Code (if you do not have the wallet and need one, continue reading the instructions from page 8);

To scan the QR code of your wallet address, open your mobile application (ex: Blockchain) and press → Request;

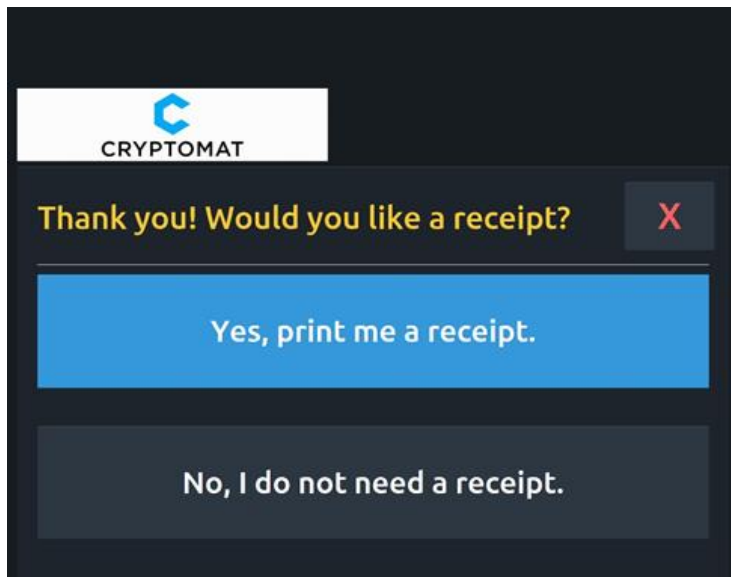

Now, scan your wallet QR code (barcode) from your mobile application;

Note: For the best scan hold your QR code 10-15 centimeters away from the scanner;

Insert cash bills into the bill acceptor¹;

Press → Finish;

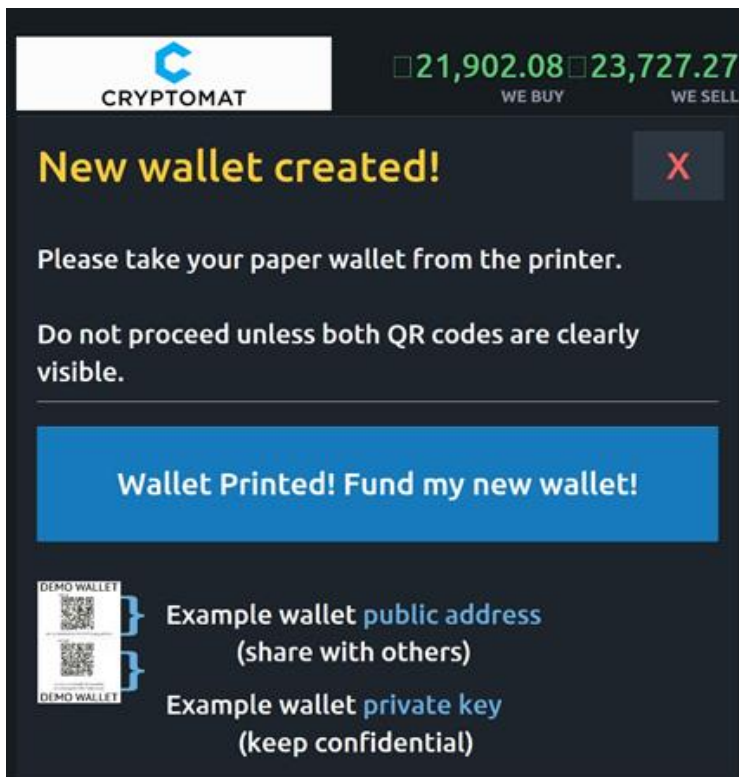

¹ *Note:* How much of BTC, BCH, LTC, ETH you can buy for the cash inserted, is shown on the screen; Additionally, on the upper right corner of Cryptomat ATMs BTC, BCH, LTC, ETH exchange rates are indicated (green-colored fonts).

Buy Coins via Wallet Paper

If you do not have the digital wallet, select  Create New Wallet;

Paper wallet will be generated and printed out by the Cryptomat ATM;

Paper wallet is created! Please, take it from the printer;

Before proceeding, make sure that both QR codes are clearly visible on the paper;

Note: First barcode is a public address of your wallet and you can share it with others;
Second barcode is a private key and you should keep it confidential;

Now, click  Fund my new wallet!

Put cash bills into the machine;²

Please be noted that minimum purchase amount is 10 GEL.

Click  Finish;

Take a receipt;

Your transaction has been completed!

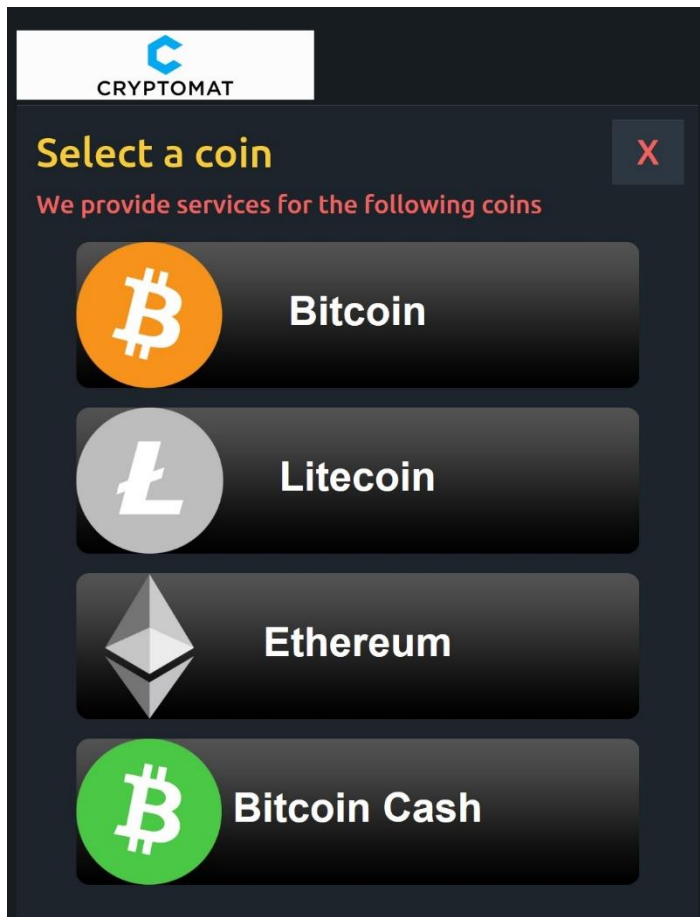

Your paper wallet is funded!

² *Note:* How much of BTC, BCH, LTC, ETH you can buy for the cash inserted is shown on the screen; Additionally, on the upper right corner of Cryptomat BTC, BCH, LTC, ETH exchange rates are indicated (green-colored fonts).

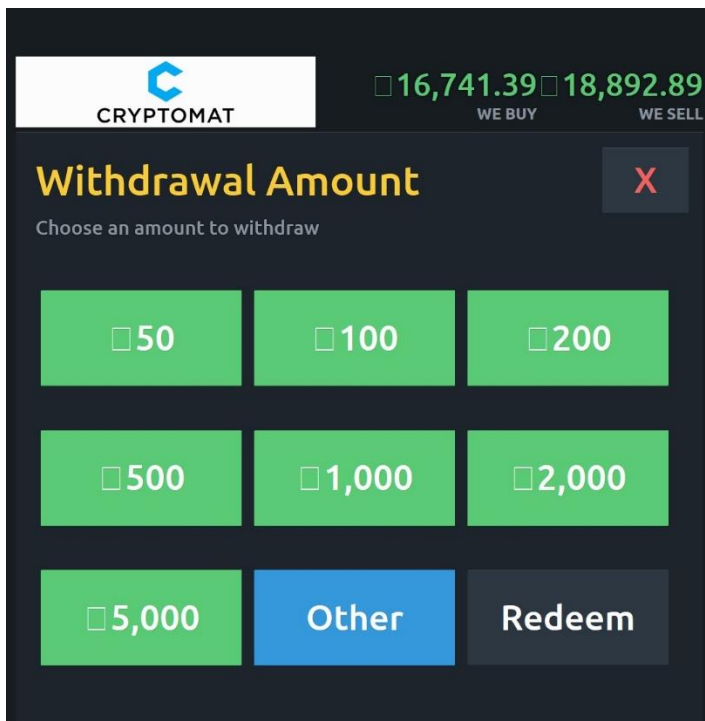

Withdraw Cash

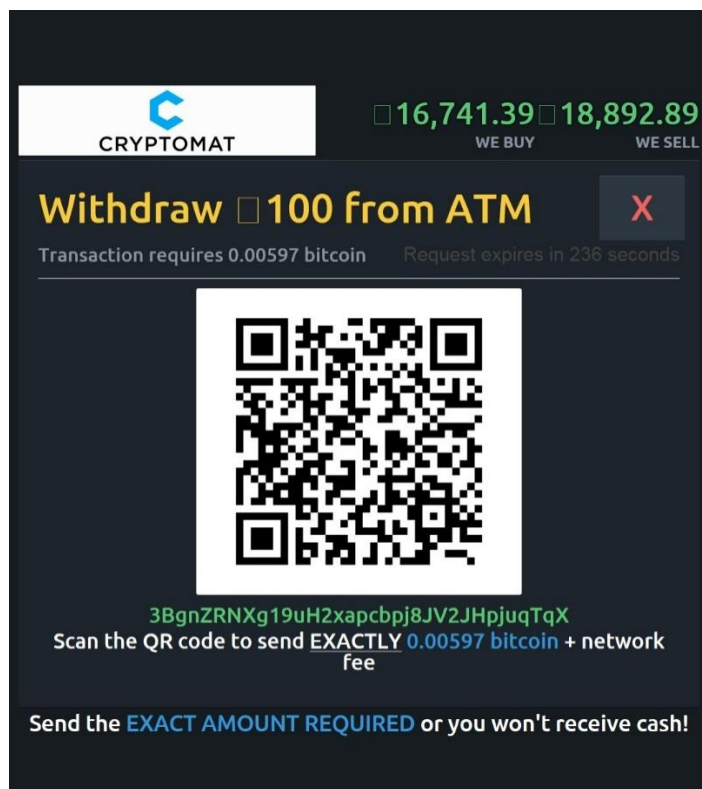

To sell your coins for cash/withdraw in GEL, choose → Withdraw Cash from the start menu;

Select the coin you want to cash out: Bitcoin, Litecoin, Ethereum or Bitcoin Cash;

Choose the amount you want to withdraw³;

Barcode/QR code and the address (green-colored fonts) – where your coins should be sent – appears on the screen;

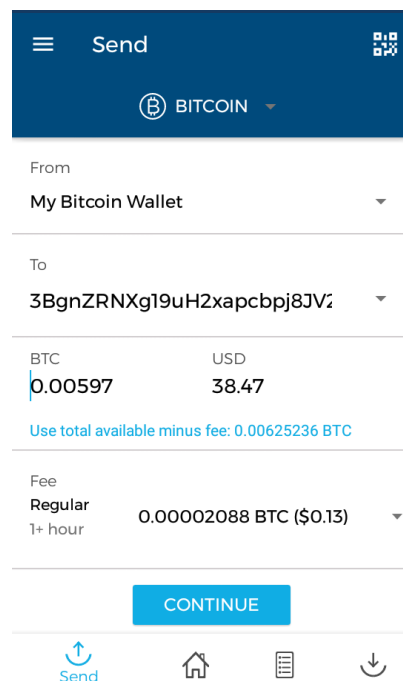

To continue the transaction, open your mobile application (ex: Blockchain) and press  Send;

In order to insert the indicated address into the field “To: Enter Bitcoin/litecoin address” press on the Barcode symbol on the upper right corner of your mobile phone;

Now scan the barcode/QR code from the Cryptomat ATM screen;

Check if those two addresses (on the Cryptomat ATM screen and in your mobile application) match each other;

In your mobile application confirm sending the coins to the indicated address;

³ Note: Withdrawing more than 3000 GEL from Cryptomat ATMs [at first] requires a confirmation on the Blockchain Network.

If your withdrawal exceeds 3000 GEL, continue reading the instructions from page 13.

After confirmation, take cash and/or only receipt (in case you are withdrawing more than 3000 GEL, continue reading the instructions from page 13);

Transaction was successfully completed!

Withdraw Cash via Redemption Code

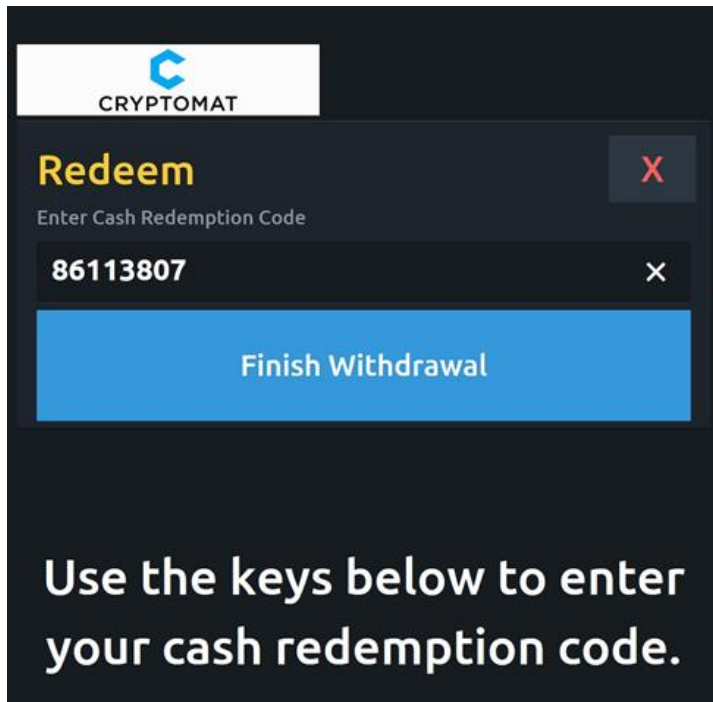

If the amount of money you want to withdraw exceeds 3000 GEL, prior to receiving the cash transaction will require a Network Confirmation on Blockchain;

Until your transaction is confirmed, take a receipt with an 8-digit Redemption Code from the Cryptomat ATM and wait for the confirmation on the Blockchain Network;

Save the receipt and wait for couple of minutes (on average 30 minutes);

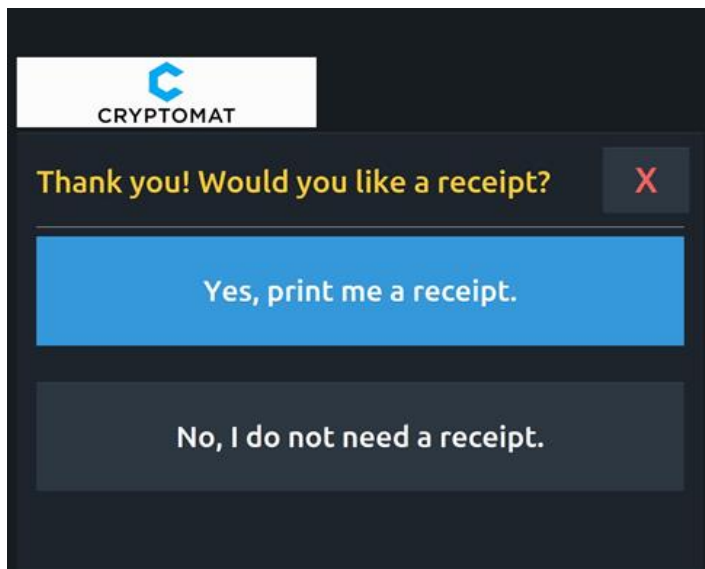

After that your transaction is confirmed, go back to the main menu and select ➡ Redeem;

Enter Cash Redemption Code in the corresponding field;

Click → Finish Withdrawal;

Indicate if you want to receive a receipt;

Transaction was successfully completed!

Take your money [and receipt]!
